

Future plans

Starting post graduate AICTE approved MCA:

The institution intends to start the MCA (Master of computer Application) program approved by AICTE. As our college already runs the graduation program in B.Sc.(Computer Science), B.Sc.(Information Technology) and BCA (Bachelor of Computer Application). We have made proposal to AICTE and will be start from A.Y. 2025-26. Above program will help students to continue their higher studies without any hassle. We have encountered issues pertaining to students in selecting various colleges for MCA.

To grow strong relationships with the industries:

As we have successfully conducted many placement and internship drives through college, we intend to have MoUs(Memorandum of Understanding) with the IT companies From Ch. Sambhaji Nagar and Pune, This will help the students to gain knowledge with expert talk seminars and hands on workshops. More over the IT companies needs student interns from time to time on various domains. We are expecting to build good symbiotic relationships with the companies.
